DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: the specification contains blank pages: pages 71, 89, 94 and 108. It is unclear if text is missing. Appropriate correction is required.

The specification is also objected to because it does not contain a Brief Description of the Drawing. MPEP 601.01.

Additionally, the continuing data in the specification should be updated to reflect the fact that parent application 10/096,218 has been allowed.

Finally, the lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain <u>a</u> patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer <u>cannot</u> overcome a double patenting rejection based upon 35 U.S.C. 101.

Application/Control Number: 10/696,021

Art Unit: 1621

Claim 1 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of prior U.S. Patent No. 6,660,756. This is a double patenting rejection.

The examiner notes for the record that applicant states in the Preliminary Amendment that claim 1 will be canceled.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 27 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim is unclear because the variables R²-R⁷ are undefined.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 27 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by EP 0 644 176 A1. The reference teaches the asymmetrical hydrogenation of applicant's compound XIII to yield a compound of formula IIa (Claim 1 of EP 0 644 176 A1).

Application/Control Number: 10/696,021

Art Unit: 1621

Claim 27 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by *Tetrahedron Letters* (1999), 40(11), p. 2187-2190. The reference teaches the asymmetrical hydrogenation of applicant's compound XIII to yield a compound of formula IIa (Scheme 3; Table 1).

Allowable Subject Matter

Claims 25 and 26 are allowed.

Claims 25 and 26 are drawn to processes of making the set of compounds of formula (I). This set of compounds was previously found allowable in the parent for reasons of record in the parent. Thus, the method for making these same compounds is also per force allowable.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian J. Davis whose telephone number is 571-272-0638. The examiner can normally be reached on 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann Richter can be reached on 571-272-0646. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
